Mercury Notifications Receives the Prestigious ASTORS  
2021 Homeland Security Award

December 1, 2021 – Woodbury, NY – Mercury Notifications, a leading B2B life-safety-solutions provider and product manufacturer of the n.FORM® Mass Notification System, is honored to announce they are the proud recipient of a 2021 ‘ASTORS’ Gold - Homeland Security Award from the American Security Today. The award was made public at the ISC East 21 show in New York City last month.

American Security Today’s Annual ‘ASTORS’ Awards is the preeminent U.S. Homeland Security Awards Program, and 2021 marks its Sixth Year, of recognizing industry leaders of Physical and Border Security, Cybersecurity, Emergency Preparedness, Management, Response, Law Enforcement, and First Responders. The award program acknowledges leaders in private and public business sectors, as well as federal, state, and municipal government agencies for their outstanding efforts to keep our nation secure.

Mercury Notifications was selected for its ability to provide a complete life-safety ecosystem and trusted mass-notification solution for emergency and non-emergency communications. Judging found that Mercury’s n.FORM® system stood out among other emergency-communication solutions because it meets rigorous and trusted UL standards for mass notification (UL 2572) and for integration with a fire alarm control unit (UL 863).

With Mercury’s hardware and software solutions, their system reaches 100% of intended audiences, 100% of the time to deliver a clear, consistent message with interior and exterior audio, digital and visual notifications.

Unifying life-safety communications is easy with Mercury providing a full suite of life-safety technologies and a system that is fully supervised, end-to-end, for mass notification emergency communication.

A part of every n.FORM System is an intuitive software platform called FieldAlert™. This software can be used to send audio and digital messages out via email, text, tweet, phone, digital signage, strobe, and desktop notification. In addition to FieldAlert™, Mercury offers other software programs for expanded system set up, access, coordination, zoning, diagnostics, and monitoring capabilities.

On hand to accept the award at the 2021 ISC East Show was Bill Tinnel, Chief Operations Officer for Mercury. Of the award, Bill said, "It is exciting and encouraging to be recognized by American Security Today and to receive the Gold Award for being a top-notch solution for mass notification. What truly thrills us is the way that this technology, and the conversation about life safety is becoming increasingly mainstream. We are honored to be recognized for our product achievements with the distinguished 2021 'ASTORS' Awards Program and thank AST for creating this platform and identifying the value of system solutions, such as Mercury's n.FORM®."

This award sends a clear message that mass notification is needed to help protect people, property, and brands. As a trusted partner within a variety of verticals such as healthcare, industrial, manufacturing, education, government, and enterprise, Mercury Notifications is dedicated to improving outcomes and to keeping people safer and better informed during crisis and non-crisis events.

### **About Mercury Notifications**

Mercury Notifications and their n.FORM™ Mass Notification System meets the UL2572 Standard for Mass Notification and the design requirements for the National Fire Protection Association (NFPA) Code 72: Fire Alarm and Signaling. The company offers both distributed audio systems and distributed recipient mass notification systems (DRMNS) to ensure messages reach 100% of the intended audience, 100% of the time. Proudly manufactured in the USA since 2013, Mercury Notifications' n.FORM® system comes with an unparalleled 10-year conditional warranty.

Mercury Notifications keeps the line of communication open enabling targeted messages via distributed audio, wide area speakers, phones, email, SMS/Text, Twitter, Skype/Teams, desktop alerts, digital signage and more. As a UL 2572 and UL 864 rated platform, Mercury integrates with Fire Alarm Control Units and provides complete emergency and non-emergency communications by zone, by building, by campus, or over a series of buildings anywhere in the world.

In addition, the company offers a complete suite of cloud-based software that enables building-to-building communication, prioritized messaging, and the ability to address, manage and monitor all your facilities from a single access point. Mercury's n.FORM® Mass Notification System is made in the USA and the n.FORM® System is installed in millions of square feet around the globe.
